

Appl. No.: 09/675,529
Amdt. dated August 25, 2003
Reply to Office action of May 23, 2003

corresponding configuration information is used to configure the system for use of the board. If a no match is ~~not~~ found, the ~~utility~~ program then checks the NVRAM extension table for a matching entry and uses a default setting. ~~If a match is found, the corresponding configuration information is used. If no match is found in either table, a default setting is used.~~
